

Introducing... the Newest, Coolest Way to Engage Your Students in Earth Science and Geography!

Standards-based lessons!

Hands-On
Fun
Innovative
Unique
Interactive
Cross-Curricular

Are you looking for an unforgettable way to engage your students in earth science and geography lessons? Check out **Earth Balloon!** This amazing 30-foot portable globe classroom is large enough to fit a class of 24! Students study the globe from the inside and outside. Lessons include:

- | | | |
|-----------------------|---------------------|------------------|
| Topography | Global Warming | Weather Patterns |
| Ancient Civilizations | Latitude/Longitude | Plate Tectonics |
| Endangered Species | International Trade | Language |
| Cardinal Directions | Pollution | Current Events |

Students access the globe through a doorway on the International Date Line. All lessons are tailored to the needs of your classroom, aligned with PA standards and taught by a PA certified teacher. What can *your* students learn from Earth Balloon?

Call us today to bring Earth Balloon to your school! (814) 262-0732
